

COVID-19 Statement

Cotswold Farm Machinery continues to monitor the current situation in regards to the COVID-19 outbreak and is monitoring the situation on a daily basis. Our priority is the safety of our staff and customers. We are taking all sanitary measures possible to ensure we follow the UK Government guidelines relating to COVID-19.

At this moment in time our staff are still available to attend for urgent repairs and servicing to support customers' needs at this time.

Following the Government guidelines, we request customers do not come into the depot building.

Please see below for measures we have put in place for business continuation.

Service

Our field service team will still be making essential farm visits, but will follow all hygiene guidelines and we ask that all customers ensure these control measures are put into place on farm to protect themselves and our engineers. Our service team will discuss appropriate control measures with customers prior to these essential farm visits.

Parts

Our parts team are still contactable by email and telephone and we can offer a delivery service for essential parts. Key suppliers are communicating with us to advise of any parts supply issues at this time and they are working on limiting any delivery disruptions.

Sales

Our sales team are available to discuss any customer enquiries via email or telephone. Please see our website for contact details.

Cotswold Farm Machinery aim to do our very best to support our loyal farming community during this time.
