

FarmerDisc

Mounted compact Disc Harrow

3.0 - 3.5 - 4.0 m working width

FarmerDisc is a newly developed mounted compact disc harrow meeting the requirements for simplicity and efficiency in modern soil cultivation. The working depth is easily adjusted and is constant.

Mounting is easily done by means of the standard cat. II or III linkage bar - Subsequently, the top link is fitted and you are ready to work.

FarmerDisc is available with cage or T-ring roller. The roller controls the depth and consolidates the soil.

As an optional the implement can be fitted with a transport kit.

The angled 520 mm jagged discs have a superb mixing effect – also in difficult conditions. Each disc, suspended by 4 rubber supports, ensures a prompt and exact break-back from stones and other obstacles.

It is possible to position the discs gangs sideways to each other. This could be useful in changing conditions in order to achieve full penetration.

Technical specifications:

Working width	Roller type	No. of discs pcs.	Weight Kg	Transport width cm	Hp min.
300 cm	Cage	22	1.750	300	100
300 cm	T-ring	22	1.900	300	100
350 cm	Cage	26	2.000	360	120
350 cm	T-ring	26	2.175	360	120
400 cm	Cage	30	2.250	410	140
400 cm	T-ring	30	2.425	410	140
