

## Low Loader Trailers

There are two types of Low Loader Trailers available :-

### Standard Low Loader Trailer

The standard Low Loader Trailer has a flat bed with a single axle at the rear which is hydraulically operated so that the bed can be lowered to the ground for easy loading and then raised for travelling. This trailer is designed to transport agricultural implements such as power harrows and drill combinations.

### Plant Low Loader Trailer

This has tandem axles under a flat bed with a beaver tail and fold down ramps at the rear for easy loading. It is designed to carry wheeled or tracked plant and equipment including diggers and excavators.
